**SFC Flowable
 Visible Light Cure Composite**

A highly polishable micro-hybrid composite

The micro-hybrid formulation ensures that the smaller particles occupy the spaces among the bigger particles to eliminate the resin rich areas in the composite and maximizes the mechanical properties and polishability.

Applications:

- Ideal for both anterior and posterior applications
- Pit and Fissure sealants
- For repairing small defects
- Fillings in the cervical gaps
- Cavity liners
- Temporary Inlays and Onlays
- Small core build-up

Features:

- Micro-hybrid formulation
- Easy to polish to high luster
- High compressive strength
- Low shrinkage
- Fluoride releasing
- Radiopaque
- Fast and deep light activation (30-40 sec.)

Technical Data:

- Nominal particle size: 0.7 micron
- Filler content: 67% by weight
- Compressive strength: 290 MPa
- Diametral tensile strength: 47 MPa
- Flexural strength: 125 MPa

Shades Available:

A1	SFC 03A1	C1	SFC 03C1
A2	SFC 03A2	C2	SFC 03C2
A3	SFC 03A3	C3	SFC 03C3
A3.5	SFC 03A3.5	C4	SFC 03C4
A4	SFC 04A4	D2	SFC 03D2
B1	SFC 03B1	D3	SFC 03D3
B2	SFC 03B2	D4	SFC 03D4
B3	SFC 03B3	Incisal	SFC 03IN
B4	SFC 03B4	Opaque	SFC 03OP

Content:

- 1 - 2g syringe
- 5 - 20 gauge needle tips
- 1 - Instruction
